

ENERGY SAVING TIPS FOR LAUNDROMATS

If possible, install high-efficiency commercial washer, including but not limited to front-loading machines, which can cut energy costs up to 50% and use about 30% less water. Energy efficient and front-loading commercial clothes washers also last 5 to 10 years longer than standard top-loading machines.

1. Remove lamps from multi-lamp fixtures.
2. **Retrofit lighting with energy-efficient bulbs through the Power Savings Blitz Program.**
